

Climatestrike Switzerland:
60'000 + people out on the street!

Some of them join the
Regional Level
(and help within working groups that
might resemble the ones on the national level).
They are working within the nationally defined guidelines,
do and coordinate a lot of great regional action,
and keep in contact with the national level.

Some of them join the
National Level
on Discord and for National Meetings with plenaries (eg in Bern).
They define the national guidelines in Working Groups & Sub Working Groups,
work on things within national importance and coordinate the regional groups.
